

SSuite PC-Drop Copy Master - Android APK App

SSuite PC-Drop makes it extremely easy to transfer/copy any files, documents, or images from an Android smartphone to any Windows PC that is connected to your local Wi-Fi network. This application uses direct Peer-To-Peer FTP(File Transport Protocol) communications for data transfers over your local Wi-Fi network.

Any local wireless network your smartphone is connected to may be used for data transfer. Devices with an IPv4 address that are connected to your local Wi-Fi network are able to send or receive files with SSuite PC-Drop. There is NO need for an internet connection or any registered cloud account for background syncing of data between devices.

There are three methods of transfer; Phone-To-Phone | Phone-to-Windows PC | Windows-to-Windows

There are two applications available for download. There is the Android app file (APK) and then there is the Windows WIN32 executable program in 32bit and 64bit versions.

Simply unzip the file and copy and paste them wherever you find best. SSuite PC-Drop uses the standard Android "Documents Folder" as the default folder to send and receive files from.

On your Windows system the program uses your "Public Documents" folder to send and receive files from. For user-friendliness operation, simplicity, and security reasons, the file paths are not allowed to be changed, this will ensure that you know where the files are being sent or received to.

[Download](#) 

Minimum System Requirements:

- Any Local Wi-Fi network
- All Windows systems - 32bit and 64bit
- KitKat Android 4.4 / ARMv7 + NEON + GPU

Permissions Needed:

- android.permission.READ_EXTERNAL_STORAGE
- android.permission.READ_PHONE_STATE
- android.permission.WRITE_EXTERNAL_STORAGE

Quick Tip!

If you don't know your smartphone's IP address, simply send a file, any small file, from your smartphone to your Windows PC running the Windows edition of PCDrop. The sent file will enable to show your smartphone's IP address in the sender's IP address editbox of the Windows edition of PCDrop.

When running the Windows edition of PCDrop, the program will automatically show your Windows PC's IP address on the top center of the program's window. Send your file to that address for a quick reminder what your smartphone's IP address is.

Quick Tip 2

If you don't have a local Wi-Fi router or network, simply switch on your smartphone's Wi-Fi hotspot to create a local Wi-Fi peer-to-peer connection. Connect other smartphones to your Wi-Fi hotspot and start transferring files directly over your smartphone's Wi-Fi hotspot.

SSuite Office - Software Made Simple

We are still the ONLY software company in the world that does not require a "Login Prompt" or "Account Registration" for you to use our Progressive Web Applications, Android apps, and Windows desktop software. Our online software also does NOT run in the Cloud, but directly inside your browser!

Your online safety and privacy are absolutely guaranteed!

Never get tracked, have your personal data collected, or be spied upon again by Big Tech or any government intelligence agency — the CLOUD is no longer private or safe for work!
